AllCure
Think beyond green!

FOOD AND HOSPITALITY

ABOUT

The industry is bustling with the idea of green cleaning and the amount of toxic chemicals used in food service, makes it one of the least sustainable industries. While people are becoming increasingly aware of their impact on the environment.

According to a 2008 National Restaurant Association survey, 62% of customers say they prefer to visit an environmentally-conscious establishment. It also revealed that cleanliness has jumped to No. 2 on the list of reasons for returning or supporting such establishments.

Traditional cleaning products are often more dangerous than the germs they are killing. Studies prove that chlorine bleach, ammonia and other cleaners release toxic vapours, many of which are suspected carcinogens.

Toxic chemicals stay around for hours and cause a variety of symptoms, including headaches, asthma, nausea and chemical burns. The last thing you want is for customers to associate these symptoms with your establishment. Green cleaning produces happy customers and improved employee productivity. Generally green cleaners are even more cost-effective than conventional products.

OBJECTIVE

The main concerns for these industries are as follows:

- 🔥 Reduce the current spend on harmful chemicals
- 🔥 Reduce and prevent drain blockage because of fat traps
- 🔥 Keep facility well sanitized and free of food contamination
- 🔥 Prevent further damage to equipment caused by corrosive materials
- 🔥 Prevent fire hazards (non-flammable products)

PRODUCTS LIST

- 🔥 Kitchen Degreaser
- 🔥 Grill & Oven Cleaner
- 🔥 Liquid Grease Trap Care
- 🔥 Granual Drain Buster
 - 🔥 San-A-Safe
 - 🔥 San-A-Med
- 🔥 Handwash Soap

Kitchen Cleaner: A combination of all-natural microbes and enzymes that consumes fats, oils and grease (FOG) as well as food waste. Digests them into water and carbon dioxide. Attacks and dissolves protein, sugar and greasy solids, providing a deep clean, slip free finish to floors, walls, food preparation surfaces, tables and all other water safe surfaces.

100ml, 500ml, 750ml, 1 L, 5L, 20L, 200L, 1 000L

Grill & Oven Cleaner: Cleans and solves the toughest kitchen ovens, grills and exhaust hood cleaning. Penetrates and dissolves build-up, baked-on carbon, grease and food deposits. Produces a "super cling" foam for initial penetration and prolonged contact time.

100ml, 500ml, 750ml, 1 L, 5L, 20L, 200L, 1 000L

Liquid Grease Trap Care: Blend of botanical extracts and vitamins which convert FOG into carbon dioxide and water. Reduces trap clogging, rancid odours and eliminates FOG build-up.

100ml, 20L, 200L, 1 000L

Granuala Drain Buster: A proprietary blend of aerobic and anaerobic bacteria selected for their ability to exhaust hood cleaning organic waste. Converts waste particles into water and carbon dioxide. Safe for people, plumbing and the environment.

50gr Sachet, 1 Kg, 20Kg

San-A-Safe: Extremely effective disinfectant, cleaner and deodoriser. Unlike conventional disinfectants, it doesn't contain chlorine, quats or alcohol, only **100% natural** food grade ingredients. Perfect disinfectant for use in the food service area, general cleaning and sports facilities. Can also be used as a hand sanitizer in a foaming dispenser.

100ml, 500ml, 750ml, 1 L, 5L, 20L, 200L, 1 000L

San-A-Med: Complete biological formula designed to disinfect, clean and deodorise. Unlike conventional disinfectants, it doesn't contain chlorine, quats or alcohol, only **100% natural** ingredients. Kills a broad spectrum of bacteria, viruses and fungi and removes mildew and black mold. Safe to use on toilets, urinals, shower cubicles, glass, mirrors, basin, baths, floors and fittings.

100ml, 500ml, 750ml, 1 L, 5L, 20L, 200L, 1 000L

Handwash Soap: A Bio-Active hand cleaner that is gentle on the hand and skin. It removes fish and egg odours as well as fat, oil and soil build-up, whilst still protecting the skin. Non-allergenic, as it contains 100% natural ingredients.

1L, 5L, 20L, 200L, 1000L

A Natural Wonder

The Bureau of Statistics has shown that since 2007, chronic disease and allergies has increased by 35% in babies and children under 14 years old. The most common are skin and respiratory disorders. It is common knowledge that chemicals impact on the environment and our well-being, thus resulting in the rise of diseases and allergies.

Biochemists have discovered, what Mother Nature has known for millions of years, a new generation of 100% all-natural cleaning solutions.

Our products are made from these 100% natural ingredients and will not pose any threats or harm on the well-being of humankind, our animals, our home and our environment, ensuring total piece of mind and safety. when using these products.

We welcome you on our journey of a healthy, cleaner, safer lifestyle and not having to worry about reading dangerous labels.

OilCure Cleaning - another natural wonder of the world

Safe - process, safeguard human user and environment

100% All-Natural - alternative to caustic and solvent based chemicals

Preventative - no harmful residue, non-toxic, non-hazardous, non-corrosive, non-flammable and hypo-allergenic

Smarter - cost effective, fit for purpose, ready to use or concentrated, depending on application requirement

Effective - detailed, independently verified data and test results
